

NUCLEAR WEAPONS AND ENERGY

TOK TOK BIPO

Developmen na use long nuclear energy long 20th century emi olsem spin-off long weapon manufakture bilong military o army. Disla emi givim rot, o justification, long wok igo het long nuclear teknologi long wol, long mak sure nuclear fission emi gutpla moa na apim stori long nuclear pawa emi cheap na safe. Tasol, nuclear energy emi false solution, o rot nogut, long climate krisis, na nuclear energy bagarapim wol peace, sekuriti na ol pipol – humanity. Long rausim, o eliminatim, nuclear weapon na nuclear energy, wantaim planti hevi, o risk, lo safety, helt na environmen, mas kamap prioti long wol – olsem global priority. Olsem fossil fuel, ol disel nabaut, emi mas dai pinis hariap na bikpla nid long disal istap; nogut ol bagarap long bipo, olsem Hiroshima, Nagasaki, Chernobyl na Fukushima, kamp gen.

LUK LUK, o Vision

Luk luk, o vision, bilong mipla emi wol we emi fri long nuclear weapon na energy, na long rausim future generation long bikpla rabis bilong radioaktiviti. Yumi mas senis aut long nuclear energy, bikos emi dangerous na emi givim polution na rabis bilong radiation. Long tanim na senis, yumi mas baim win, solar na arapela renewable energy long senisim na tanim supplu na deman long energy.

TING TING, o OBJECTIVE

Disla Hiroshima na Nagasaki nuclear bagarap, na tu Cherobyl na Fukushima nuclear bagarap, soim bikpla nid long senisim nuclear energy. Olsem, numbawan ting ting, o objective, bilong Greens emi long kamapim wanpla moratorium, o tok save we ol lain signim, long no moa nuclear pawa faktori, daunim laip long ol nuclear pawa we emi sanap pinis, na rausim isi isi, o phase aut, teknologi we emi usim o autim rabis bilong nuclear – olsem nuclear waste incinerators, food irradiators, us long uranium. Olsem tu, Greens bai wok hat long kamapim wol we ino gat nuclear weapons.

AKSEN PLEN

Antap long policy long daunim nid long energy, Greens bai wokim, long ples na long wei, olsem domestically na internationally, long tambuim nuclear weapon na nuclear pawa faktori na apim, o promotim safe, gutpla long environmen rot long energy, long kamapim wol we emi fri long nuclear pawa, nuclear weapon na fossil fuel. Olsem, Greens bai -

Nuclear Energy

- Wokim bes rot long rausim ol nuclear samting long ples na wol.
- Rausim carbon, decarbonise, long ol system long energy; long gutpla rot long usim pawa, providim strongpla supply na senisim ol fossil fuel.
- Rausim isi isi, o phase aut, ol pawa bilong nuclear, rausim, o decommission, ol nuclear we i sanap pinis, na tambuim ol plen long nupla nuclear samting.

Uranium, Thorium na Nuclear Waste

- Tambuim ol mining na export long uranium na thorium.
- Kotim ol kompani long uranium na thorium long fixim ol projek aria, na tu ol kompani mas beahainim ol lo na policy na standard long bainisim ol radioactive rabis gut.
- Mak sure, ol long taim banis aria long nuclear rabis – olsem aria mas lukautim disla nuclear rabis gut. Rausim isi isi, phase aut, nupla rabis bilong nuclear.

Nuclear Weapon

- Rausim ol faktori bilong nuclear weapon.
- Kamapim nuclear fri aria – publik na ol warf long sol wara.
- Pinisim risearch, developmen na production long nuclear weapon.
- Kilim idai ol nuclear weapon na sekurim ol rabis bilong em.
- Brukim rot namel long mining na export long uranium na nuclear weapon i gro.
- Tambuim ol autsaid, o foreign, supply long nuclear weapon insaid kantri.
- Tambuim moni long gavman igo long mining, research, developmen na supply long olgeta samting bilong nuclear na supply long nuclear.
- Tambuim supply na wok bilong nuclear long wokim nuclear weapon.
- Senisim gut, olsem kampaim wanpla tok save, olsem agrrement o treaty, long tambuim olgeta samting long nuclear weapon.

NPT na Nuclear Terrorism

- Wokim gen na strongim disla 1968 Treaty bilong Non-Proliferation long Nuclear Weapon (NPT), olsem long wokim gutpla on-site inspections long mak sure ol nuclear samting emi safe long usim.
- Luk luk long hevi long nuclear terrorism wantaim Convention long Physical Protection long Nuclear Material, na tu disla International Convention long Suppression long Acts long Nuclear Terrorism.
- Kamapim rot long wol, olsem disla Nuclear Waepon Fri Zones (NWFZ) long strongim wol long rausim nuclear olgeta na confirmim wok long kamapim peace na security.

Long Wol, o International

- Tambuim ol autsaid, o international, trade long ol nuclear samting.
- Kontrolim ol nuclear samting igo long space.
- Tambuim rabis long nuclear long wara long plese na wol.
- Tambuim ol import na wok long rabis bilong nuclear na fuel rod.
- Kamapim wok long wol long pinisim mining bilong uranium na thorium.
- Supotim na behanim disla signim bilong disla UN treaty long Porhibition long Nuclear Weapon.

Safety bilong Nuclear

- Luk luk gut na skelim tru tok – nuclear pawa ino safe, ino klin, ino gut long ekonomi na emi bullsit long daunim global grinhaus smuk, o emissions.
- Skelim gut ol rot na lo long nuclear pawa faktori na supply long em long preventim hevi inap long faktori iken pinis na dai.
- Lukautim ol nuclear reactor isanap pinis long ting ting nogut.
- Kontolim gut ol radioactivity bilong nuclear long future generation long aksen long kantri long rausim nuclear.
- Providim supot long marasin na kompensetion long ol wok lain husat igat win long radiation.
- Fixim ol aria nogut we emi gat radiation – olsem uranium mine, milling site, test site, research bilong nuclear na faktori bilong nuclear.
- Luk luk na kisim tru tok – olsem safety bilong nuclear emi responsibility long ol kantri we emi usim nuclear.

- Supotim na behainim sustainable na klia saftey bilong nuclear na sekurit long protektim ol man, meri na pikinini, komuniti na environmen.
- Holim ol bos lain, o bik man, long nuclear na makim pei long bagarap bilong nuclear em yet wokim.
- Kamapim wanpla independent netwok long ol armi na lain long ples aria we nuclear istap inap long emi pinis indai.
- Baim, kompensatim, ol lain long nuclear weapon testing.
- Fixim, o rehabilitiate, ol nuclear test site.
- Wokim, wantiam ol expert, long kisim policy bilong storage long ol nuclear samting na tu pinisim ol storage ananit graun.

Klin Renewables

- Wokim gutpla rot long apim klim energy – usim renewable energy, olsem low carbon – win pawa, solar pawa na lik lik hydo pawa.
- Wabelim long moa developmen long klin energy – olsem win, solar, sol wara pawa na hydro pawa.
- Daunim numba nogut long klin pawa – olsem sampla taim samting nogut isptap.
- Wabelim, komitim, long bikpla wok long cheap, nogat poison, solar taknolgoi long givim rot long solar pawa.
- Supotim bikpla moni bilong gavman igo long solar long putim olgeta samting long solar long gavman. Disla bai apim cost-competiveness.

Bagarap bilong Nuclear

- Daunim future win igo aut long radiation yumi wokim igo long environmen, olsem sampla moa radiation emi bai wokim moa bagarap.
- Stapim ol nuclear bagarap – olsem mining long uranium – planti ikamap long lain long ples – olsem papa na mama graun.
- Kamapim strongpla lo na penalty long bagarap long envoronmen we as emi nuclear.

Arapela, o Miscellaneous

- Daunim ol marasin bilong radioactivity na apim research bilong gutpla rot – olsem alternatives.
- Wokim gen, o recycle, ol marasin long radioactive samting na kamapim gutpla storage aria long putim poison na ol rabis bilong nuclear.
- Tambuim ol graun aria long kukim rabis bilong radiation.
- Kontrolim use long radioactive samting long siens – ananit disla standard long siens na monitoring techniques.
